

Angle head 90° type MONO WSX
 For single milling and boring operations without clearance issues.

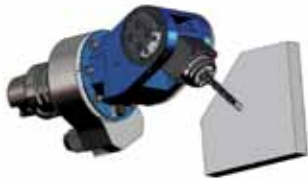

Double sided angle head 90° type DUO WZX
 For two milling and boring operations in opposite directions.

Angle head 90° offset type FORTE WWX
 Compared to our MONO type it has an increased usable tool length, internal coolant is an option.

Angle head 90° narrow form type SLIM WGX
 To slide into small bores or when clearance issues/space restrictions are an issue.

Adjustable angle head 0-100° type **FLEX WDX**
For boring or light duty milling applications at any angle.

Fixed angle head type **FIX WFX**
For milling and boring operations at a fixed angle.

Multi spindle head **MULTI**
To drill multiple holes at one time.

High speed spindle **RAPIDO SL / SLI**
For boring or light duty milling applications with increased rpm.
