

### The Auto Tool Range

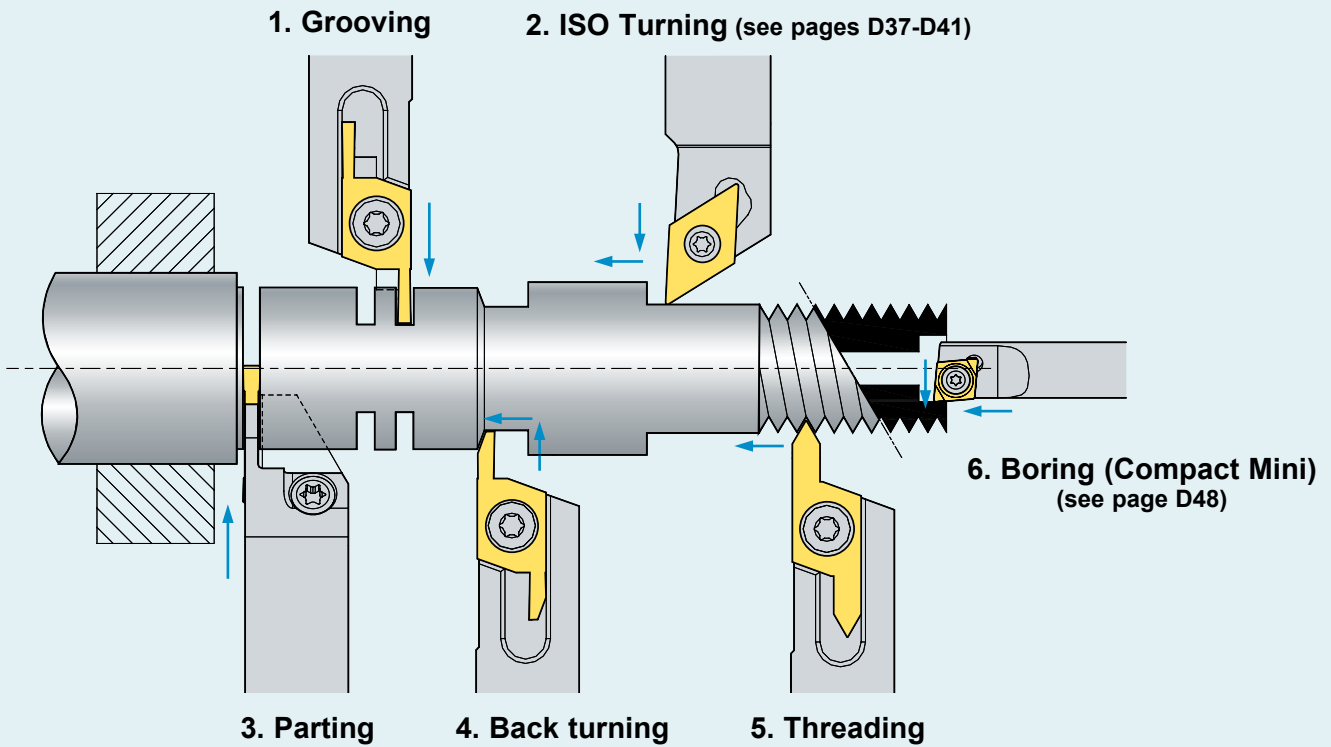

The Auto Tool range is designed for applications where size & precision matters. The inserts are precision ground to the highest tolerance for ultimate accuracy and are excellent for complicated machining.

The range comes on a variety of small shank sizes starting at 8mm making it ideal for Automatic lathes, sliding heads or any other machine where small shank tooling is required.

Auto Tools are available in the FGT style, ISO Turning, MGT Multi-Grooving Tools and Compact Mini Boring Bars.

- Excellent for precision machining
- Excellent for complicated machining
- Excellent for small part machining
- Various insert sizes and geometries can be clamped on one FGT holder
- ISO holders offset "0"
